

FastDrive Platform Guide

2026-08-19 | <https://drive.fastsmc.com>

FastDrive is an open-source **file-management app** built with — a server-side, HTMX-driven port of the core of . Python-first, no JavaScript framework: a file/folder browser with breadcrumbs, shared / starred / recent / trash views, file detail with shares + activity, upload, and an AI assistant grounded in the (s

Your team's files, organised and under control.

Build with the FastDrive API.

[Back to product](#)

DEVELOPER PLATFORM · API V1

Build with the FastDrive API.

Read the live demo database through a typed, versioned API. Selected integration writes are implemented behind bearer-token authentication.

[Open Swagger UI](#)[Open ReDoc](#)[Download swagger.json](#)[View on GitHub](#)

Public preview access. GET endpoints require no authentication. Writes return 503 until FASTSME_API_TOKEN is configured; enabled clients send Authorization: Bearer <token>.

Resources

Files and folders

Drive entities including files and folders.

```
GET /api/v1/files
```

```
GET /api/v1/files/{id}
```

Shares

Role-based file and folder shares.

```
GET /api/v1/shares
```

```
GET /api/v1/shares/{id}
```
